

EXEL COMPOSITES STATION PLATFORMS

Exel Composites has a long history and good knowledge with composite solutions for various railway infrastructure applications.

Exel station platforms are an excellent choice due to composites' special features that bring significant benefits and savings to our customers

The following table shows the live load with various spans

Span	Uniform live load L/D = 500
2.5 m	7.47 kPa
3.0 m	4.32 kPa
4.0 m	1.90 kPa
5.0 m	1.05 kPa
6.0 m	0.61 kPa

Safety factor = 2.5

YOUR BENEFITS WITH EXEL STATION PLATFORMS

- Durable, non-corrosive composite solution
- No need for costly heavy duty lifting equipment
- Time saving for fast and easy installation with minimal passenger disruption
- High strength pultruded structural profiles utilized
- Lightweight, easily adjustable modular system
- Long life span
- Minimal maintenance needs
- Safe, anti-slip surface

Exel's station platform provides a durable and cost-effective solution
