

Notes:

- Resin types available:
 - ISO PE is general duty resin which provides excellent corrosion resistance in many applications.
 - VE is a premium grade resin which has higher strength properties, retains strength better at elevated temperatures, and provides a wider range of corrosion resistance than isophthalic polyester.
- VE resin profiles must be used if profiles are to be concreted in place.
- It is recommended to paint profiles with a good quality urethane or acrylic paint system to improve UV resistance.
- All products are supplied in 6 metre lengths.
- All prices are ex-works Boronia, VIC.
- All prices are excluding GST.
- For non-account customers we accept EFT of credit card payments prior to shipping.
- Minimum order value is \$1,000 + GST per transaction.
- Standard Exel Composites terms and conditions apply.
- Minimum mill run for Non-Standard Profiles is 500m for large profiles and 1,000m for small profiles.
